

THE BEST OF GREATER TALLAHASSEE!

The CCC is a coalition of cultural, scientific, natural history, and civic organizations in North Florida and South Georgia. One of our signature projects is providing **grants to area teachers** via on-line applications at our website: **www.communityclassroom.com**. In addition, CCC provides opportunities for networking, professional development, and community partnerships. We meet as a group four times a year at various member sites. Throughout the year the CCC hosts community events for teachers, educators and the public where CCC members are encouraged to participate and promote their institutions. Collectively we can better serve our community and have more fun while we do it!

We hope you will discover these exciting resources for yourself, your family and your organization!
